4759 Travertino Street  
Dublin, CA 94568  
(408) 981-5048  
darlena.k.tran@gmail.com

## OBJECTIVE

I intend to pursue a career in the technological or design field.

## WORK/VOLUNTEER EXPERIENCE

### CJSF, Fallon Middle School — *CJSF Conference*

September 2016 - May 2016

For the California Junior Scholarship Federation, I assisted in the preparation and execution of its conference honoring the organization's ten year anniversary. The conference featured a guest speaker, a raffle, lunch, and multiple workshops for attendees to visit. My school hosted this event. I additionally conducted volunteer services for this club.

## EDUCATION

### Dublin High School, CA — *Advanced Diploma (anticipated 2021)*

Late August 2017 - Present

Relevant Courses: Computer Science and Engineering (CSE)

## PROJECTS

### Scratch Project — CSE

My partner and I created a game based off the popular Harry Potter series where the user battled against various death eaters in levels of varying difficulty. In Harry Potter vs. Death Eaters, the number of lives and the player's score was kept track of on top of the screen.

### App Inventor Project — CSE

My partner and I developed a user-friendly, interactive application that functioned as an addictive game. Color Hex's objective was to rotate the multi-colored square to get the ball that changed colors each round into the right slot. The user scored points each time the ball touched the right color in the unlimited levels, and the game featured sound effects as well.

## SKILLS

Language - Vietnamese  
(fluent)

Language - Spanish  
(proficient)

Computer Skills - Google  
Docs, Google Slides, Microsoft  
Word, Microsoft PowerPoint

Computer Programming -  
HTML, CSS
